

# WE'LL TAKE IT BACK

Trade in your used devices for credit for your school or let us recycle them responsibly.<sup>1</sup>

## Three easy steps to trade in or recycle your devices:

- 1** Call an Account Manager to receive an estimate for your trade-in value or learn how we can help you recycle them
- 2** Accept the trade-in quote and ship devices to us with packaging and labels we provide or we will arrange device pickup
- 3** We'll credit your account with the trade-in value you can apply to new purchases

**Call an Education Account Manager to find out the value of your technology:**

**1-800-373-3050**

<sup>1</sup>The Best Buy Education Trade-In and Recycling program is not available on the Best Buy Web site or in Best Buy stores. Not all products are eligible for trade-in and/or recycling. Trade-in value may vary and will be based on our evaluation of your product. Payment is in the form of credit with Best Buy Education. You are responsible for removing any data from your product before providing the product for evaluation. You will be required to agree to the terms & conditions. Best Buy reserves the right to refuse items, limit quantities, or charge shipping/ processing fees depending on the product.

# WE RECYCLE RESPONSIBLY

We take all kinds of used tech, no matter where you bought it or how old it is.

## What we do:

- Best Buy has the largest, most comprehensive retail appliance and electronics collection program in the United States.
- We've responsibly recycled 1 billion pounds with a goal of recycling an additional 2 billion pounds by 2020.

## How we do it:

- Best Buy requires recycling partners to comply with the highest industry standards regarding the reuse, refurbishment or recycling of products as well as waste disposal generated from the recycling process.

## We do it right:

When wiping hard drives, our recycling partners use a process that meets or exceeds Department of Defense standards.

Certificates of destruction are available upon request.

In addition to our strict environmental standards, we require all electronics recycling partners to maintain:

- ISO 14001<sup>1</sup> certified environmental management system (or equivalent)
- R2<sup>®2</sup> Responsible Recycling Practices Standard certification
- eStewards<sup>®3</sup> Standard certification

## Learn more at [BestBuy.com/recycle](https://www.bestbuy.com/recycle)

<sup>1</sup>ISO 14001 sets out the criteria and framework to follow for an effective environmental management system. It is used by organizations regardless of activity or industry sectors. Using ISO provides assurance to company management and employees as well as external stakeholders that environmental impact is being measured and improved.

<sup>2</sup>The Responsible Recycling Practices Standard (R2) is a set of voluntary principles and guidelines designed to promote and assess responsible practices for electronics recyclers. The certification covers programs associated with worker health and safety, security, the environment and the downstream management of end-of-life electronic material and equipment.

<sup>3</sup>The e-Stewards Standard is a set of performance requirements created specifically for the electronics recycling and asset recovery industries. Written for international use, the e-Stewards Standard is consistent with international waste trade laws, social accountability standards, data privacy requirements of customers and environmental and health & safety management system norms.
