TRANSFORM YOUR ENVIRONMENT & CAPTIVATE YOUR AUDIENCE

Excite, engage and inform your customers on a grand scale with Samsung Video Walls

SAMSUNG

Video walls excite, engage and inform your customers on a grand scale. Whether your business is hospitality, retail, travel, entertainment or anything in between, video walls promote your products and services with dynamic digital impact. There's no comparison between a static image or sign and an entire video wall of large-scale graphics or video to showcase what sets you apart from your competitors. Samsung's superior panel technology and advanced color calibration are unmatched in the industry, so your images and messages will be displayed at the highest quality and performance available in the video wall display market.

WHY SAMSUNG VIDEO WALLS?

- Offers some of the industry's best color calibration technology
- Market-leading ultra-narrow bezel
- Flawless uniformity
- Breathtaking visual experience
- Helps inspire customer interaction

HIGHER DURABILITY FOR LONGER-TERM USAGE

Samsung video walls are both heat- and dust-resistant, and offer a high weight-bearing capacity. Screen burn-in protection helps prevent static images from remaining on-screen after long periods of time.

NON-GLARE PANEL

Non-glare panels ensure vivid, high-visibility content, even in strong direct light, so they can be installed in a variety of environments with little or no glare or reduction of quality.

HIGH-CONTRAST RATIO

Samsung's high-contrast ratio and darker black deliver outstanding images and detail.

PC-LESS, ALL-IN-ONE CONTENT MANAGEMENT SYSTEM

Samsung video walls are equipped with a powerful software solution that allows users to control a multitude of rich content without requiring an external processor unit.

UHD CONTENT ON A BIGGER VIDEO WALL

Samsung video walls are equipped with the industry's first integrated DisplayPort (DP) 1.2 and HDMI ports. This allows Samsung's UDE-B and UDE-C video walls to display Ultra-High Definition (UHD) content such as live TV or Blu-Ray discs, across video wall configurations as large as 5x5 without needing expensive external hardware.
