CONNECTING THE CARD READER
Plug one end of the USB cable into the card reader and the other end into an available USB port on your computer. Your computer loads the drivers automatically.

USING THE CARD READER
Cautions:
• Insert cards into the correct slot label side up. Failure to do so may result in damage to your card and/or card reader.
• Do not remove memory cards while the blue or green data LED on the reader is flashing. Doing so may lead to loss of data or damage to your memory card.
• This card reader supports multiple cards at the same time, such as CF+MS+SD+microSD or CF+MS+SD+M2. It does not support microSD and M2 cards at the same time.

If you connect this card reader to a USB 2.0 port, the green LED lights. When you transfer data over USB 2.0, the green LED blinks. If you connect this card reader to a USB 3.0 port, the blue LED lights. When you transfer data over USB 3.0, the blue LED blinks.

To access a memory card using Windows:
1 Insert a card into the appropriate slot, label side up. The data LED lights.
2 Click Start, then click My Computer/Computer. Double-click the drive letter to see its contents.
3 Use normal Windows procedures to open, copy, paste, and delete files.
4 Right-click the name of your card and select Eject when you are finished.
5 Do not remove your card from the card reader until the data LED stops blinking and the name of your card disappears from the window.
To access a memory card using Mac OS 10.4.x or higher:
1 Insert a card into the appropriate slot, label side up. The data LED lights.
2 Open the Finder window, then click your card's name in the left menu to view its contents.
3 Use normal Mac procedures to open, copy, paste, and delete files.
4 Right-click the name of your card and select the **Eject** when you are finished.
5 Do not remove your card from the card reader until the data LED stops blinking and the name of your card disappears from the Finder window.
