One-year limited warranty - Insignia Televisions  ......... 83
CHILD SAFETY

PROPER TELEVISION PLACEMENT MATTERS

THE CONSUMER ELECTRONICS INDUSTRY CARES

- Manufacturers, retailers and the rest of the consumer electronics industry are committed to making home entertainment safe and enjoyable.
- As you enjoy your television, please note that all televisions - new and old - must be supported on proper stands or installed according to the manufacturer's recommendations. Televisions that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, carts, etc., may fall over, resulting in injury.

TUNE IN TO SAFETY

- ALWAYS follow the manufacturer's recommendations for the safe installation of your television.
- ALWAYS read and follow all instructions for proper use of your television.
- NEVER allow children to climb on or play on the television or the furniture on which the television is placed.
- NEVER place the television on furniture that can easily be used as steps, such as a chest of drawers.
- ALWAYS install the television where it cannot be pushed, pulled over or knocked down.
- ALWAYS route cords and cables connected to the television so that they cannot be tripped over, pulled or grabbed.

WALL OR CEILING MOUNT YOUR TELEVISION

- ALWAYS contact your retailer about professional installation if you have any doubts about your ability to safely mount your television.
- ALWAYS use a mount that has been recommended by the television manufacturer and has a safety certification by an independent laboratory (such as UL, CSA, ETL).
- ALWAYS follow all instructions supplied by the television and mount manufacturers.
- ALWAYS make sure that the wall or ceiling where you are mounting the television is appropriate. Some mounts are not designed to be mounted to walls and ceilings with steel studs or cinder block construction. If you are unsure, contact a professional installer.
- Televisions can be heavy. A minimum of two people is required for a wall or ceiling mount installation.

MOVING AN OLDER TELEVISION TO A NEW PLACE IN YOUR HOME

- Many new television buyers move their older CRT televisions into a secondary room after the purchase of a flat-panel television. Special care should be made in the placement of older CRT televisions.
- ALWAYS place your older CRT television on furniture that is sturdy and appropriate for its size and weight.
- NEVER place your older CRT television on a dresser where children may be tempted to use the drawers to climb.
- ALWAYS make sure your older CRT television does not hang over the edge of your furniture.
Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. The wall plug is the disconnecting device. The plug must remain readily operable.
16. Remote control batteries should not be exposed to excessive heat such as sunshine, fire, or the like.
17. The apparatus should not be exposed to dripping or splashing, and no objects filled with liquids, such as vases, should be placed on the apparatus.
18. Your TV has four VESA mounting holes on the back. If you attach a wall-mount bracket or TV stand to the back of your TV, the bracket or stand must be securely attached using all four holes. If you do not use all four mounting holes, your TV may fall and cause property damage or personal injury. See the documentation that came with your wall mount or TV stand for complete mounting instructions.

WARNING

Electric shock hazard
To reduce the risk of fire or electric shock, do not remove any cover or expose the device to rain or moisture. No user-serviceable parts are inside. Refer servicing to qualified service technicians.

Lightning
For added protection for your device receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the power outlet and disconnect any antenna or cable system. This helps prevent property damage and personal injury from lightning and power line surges.

Power lines
An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, take extreme care to keep from touching such power lines or circuits as contact with them might be fatal.
Handling the LCD panel

- Your TV's screen is made of glass. Do not drop your TV or hit, jolt, or press hard against the LCD panel. If the screen breaks, be careful of broken glass.
- If the LCD panel is broken, make absolutely sure that you do not touch the liquid in the panel. This may cause skin inflammation.
- If the liquid gets in your mouth, immediately gargle, rinse, and consult with your doctor. Also, if the liquid gets in your eyes or touches your skin, consult with your doctor after rinsing for at least 15 minutes or longer in clean water.

Replacement parts

When replacement parts are required, make sure that the service technician uses replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, personal injury, or other hazards.

Safety check

After completing any service or repair to this device, ask the service technician to perform routine safety checks to determine that your TV is in correct operating condition.

Power source

Operate your TV only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied to your home, consult an electrician or your local power company.

Servicing

These servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

CAUTION

Damage requiring service

Unplug this TV from the power outlet and refer servicing to qualified service personnel under the following conditions:
- When the power supply cord or plug is damaged or frayed.
- If liquid has been spilled or objects have fallen into your TV.
- If your TV has been exposed to rain or water.
- If your TV does not operate normally by following the operating instructions. Adjust only those controls covered by the operating instructions because incorrect adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore your TV to its normal operation.
- If your TV has been dropped or damaged in any way.
- When your TV exhibits a distinct change in performance.

Outdoor antenna grounding

If an outside antenna or cable system is connected to your TV, make sure that the antenna or cable system is grounded to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA No. 70, provides information with respect to correct grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of the antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

Condensation

Moisture will form on the TV if the TV is brought from cool surroundings into a warm room or if the temperature of the room rises suddenly. When this happens, the TV's performance may be impaired. To prevent this, let the TV stand in its new surroundings for about an hour before switching it on, or make sure that the room temperature rises gradually.

Note to CATV system installer

Article 820 of the National Electrical Code, ANSI/NFPA No. 40 provides guidance for correct grounding. Specifically, it states that the cable ground must be connected to the grounding system of the building as close to the point of cable entry as practical.

Condensation

Moisture will form on the TV if the TV is brought from cool surroundings into a warm room or if the temperature of the room rises suddenly. When this happens, the TV's performance may be impaired. To prevent this, let the TV stand in its new surroundings for about an hour before switching it on, or make sure that the room temperature rises gradually.

Condensation may also form during the summer if the TV is exposed to the breeze from an air conditioner. In such cases, change the location of the TV.

Mobile telephone warning

To avoid interference with your TV picture and sound, operating problems, or even damage, keep your cordless and cellular telephones away from the TV.
**End of life directives**

Your TV may contain materials that are regulated for environmental reasons. Your TV also contains materials that can be recycled and reused. To help protect the environment, contact your local authorities for information about disposal or recycling and about finding a recycler in your area before you dispose of your TV.

**Non-active pixels**

The LCD panel contains almost 3 million thin film transistors, which provide exceptionally sharp video quality. Occasionally, a few non-active pixels may appear on the screen as a fixed blue, green, or red point. These non-active pixels do not adversely affect the performance of your TV, and are not considered defects.

What connection should I use?

Your Insignia Roku TV has several connection types for connecting devices to your Insignia Roku TV. For the best video quality, you should connect a device to the best available connection. Use the following tables to identify cables:

<table>
<thead>
<tr>
<th>Video quality</th>
<th>Connection type and jack</th>
<th>Cable connector</th>
</tr>
</thead>
<tbody>
<tr>
<td>Best (use this if your devices have HDMI)</td>
<td>HDMI video/audio</td>

</tr>
<tr>
<td>Good</td>
<td>AV (composite video) (requires an audio connection)</td>
<td></td>
</tr>
<tr>
<td>Good</td>
<td>Coaxial video/audio</td>
<td></td>
</tr>
</tbody>
</table>

Cautions

- Check the jacks for position and type before making any connections.
- Loose connections can cause poor audio or video quality. Make sure that all connections are tight and secure.
- The external audio/video devices shown may be different from your devices. If you have questions, refer to the documentation that came with your devices.
- Always turn off your Insignia Roku TV when connecting external devices.
Connecting a cable or satellite box

Many cable or satellite TV boxes have more than one connection type. To get the best video, you should use the best connection type available. For more information, see What connection should I use? on page 15.

You can connect your cable or satellite box using:

• HDMI (best)
• AV (composite video) (good)
• Coaxial (good)

HDMI (best)

1 Make sure that your Insignia Roku TV's power cord is unplugged and all connected devices are turned off.
2 Connect the incoming cable from the cable wall jack to the cable-in jack on the cable or satellite box.
3 Connect an HDMI cable (not provided) to an HDMI jack on the side or back of your Insignia Roku TV and to the HDMI OUT jack on the cable or satellite box.
4 Plug your Insignia Roku TV's power cord into a power outlet, turn on your Insignia Roku TV, then turn on the cable or satellite box.
5 On the Home screen, press \( \wedge \), \( \vee \), \( \leftarrow \), or \( \rightarrow \) to highlight the HDMI 1, HDMI 2, or HDMI 3 tile, then press OK.

Note
An HDMI cable carries both audio and video. You do not need to use any audio cables.

Installing remote control batteries

Open the back of your Insignia Roku TV remote control and insert two AAA batteries, observing the proper orientation. Reattach the back cover.

Insignia Roku TV remote control on page 13 explains how to use the remote control in each of your Insignia Roku TV’s operating modes.

Cautions

- Batteries should not be exposed to excessive heat, such as sunshine, heat registers, or fire.
- Battery chemicals can cause a rash. If the batteries leak, clean the battery compartment with a cloth. If chemicals touch your skin, wash immediately.
- Make sure that batteries are disposed of correctly. Do not burn or incinerate.

Notes

- Do not mix batteries of different types.
- Do not mix old and new batteries.
- Remove batteries when the charge is depleted.
- If the remote control is not going to be used for an extended period of time, remove the batteries.

Aiming the remote control

- Point the remote control towards the remote sensor on the front of your Insignia Roku TV.
Guided Setup

With the preliminaries out of the way, it's time to turn on your Insignia Roku TV. As your Insignia Roku TV starts for the first time, it leads you through Guided Setup, which configures your Insignia Roku TV before you start to use it. During Guided Setup, you'll:

- Answer a few questions
- Provide network connection information
- Get a software update
- Link your Insignia Roku TV to your Roku account.
- Connect devices such as a DVD player, game console, or cable box.

### Note

Guided Setup only runs the first time you turn on your Insignia Roku TV. If you need to run Guided Setup again, you'll have to perform a factory reset, as explained in Factory reset everything on page 64.

### Starting Guided Setup

To start Guided Setup, press the **POWER** button on the remote control to turn on your Insignia Roku TV.

When you first turn on your Insignia Roku TV, it will take a few seconds to get itself ready. You'll notice the following things happening:

1. The status light blinks every time your Insignia Roku TV is busy doing something; in this case it's powering up and getting ready for you.
2. The power-on screen appears and the status light blinks slowly for a few more seconds. The power-on screen displays an Insignia Roku TV logo while your Insignia Roku TV starts up.
3. After a few seconds, Guided Setup starts.
Setting up your Insignia Roku TV

With the first Guided Setup screen on your Insignia Roku TV, follow these steps to set it up:

1. Press **OK** or **RIGHT** on the remote control to go to the next screen:

2. Press **OK** to select **Set up for home use**. Home mode is the right choice for enjoying your Insignia Roku TV. It provides energy saving options as well as access to all features of your Insignia Roku TV.

   **Note**
   Store mode configures your Insignia Roku TV for retail display and is not recommended for any other use. In store mode, some features of your Insignia Roku TV are missing or limited. To switch from one mode to the other, you have to perform a factory reset as explained in Factory reset everything on page 64, and then repeat Guided Setup.

   After you select **Set up for home use**, your Insignia Roku TV scans for the wireless networks within range and displays them in order, with the strongest signals first. In addition to your own wireless signal, your Insignia Roku TV might pick up signals from your neighbors.

3. Press **UP** or **DOWN** to highlight the name of your wireless network, and then press **OK** to select it.
Other options:

- **Connect to the Internet later** — If you’re unable to connect to the Internet, that’s OK. You can skip this step and use your Insignia Roku TV to watch broadcasts, play games, and watch DVDs. If you want to connect later, it’s easy. We’ll show you how in Benefits of connecting on page 40. Connecting your Insignia Roku TV enables you to choose from thousands of streaming channels so your Insignia Roku TV really wants you to connect, and will try a couple more times to convince you that connecting is a good idea.

  **Note**
  
  If you decide not to connect, Guided Setup skips ahead to setting up the devices that you’ve connected to your Insignia Roku TV. See Non-connected Insignia Roku TV Home screen on page 40 to get started using your non-connected Insignia Roku TV.

- **Scan again / Scan again to see all networks** — This option depends on the number of wireless networks within range.
  
  - **Scan again** appears if the list already shows all available wireless networks within range. If you don’t see your wireless network name in the list, you might need to adjust the location of your wireless router or your Insignia Roku TV, turn on your router, or make other changes. When everything is ready, select Scan again to see if your network name now appears in the list.
  
  - **Scan again to see all networks** appears if your Insignia Roku TV finds more than seven wireless networks, because your Insignia Roku TV initially displays only the strongest seven networks. If you don’t see your wireless network name in the list, this option displays the complete list. If you still don’t see your network name, you might have your router configured to provide wireless service as a “private network.”

  **Note**
  
  Highlighting either of these options displays an informational panel with the unique media access control (MAC) address of your Insignia Roku TV. You will need the MAC address if your wireless router is configured to use MAC address filtering.

- **Private network** — If your wireless network name is hidden, it won’t appear in the list. Select Private network to display an on-screen keyboard, and use it to enter your network name. Unless you changed the factory-set network name, you can find the name (also called SSID) on a label on the router.

  **Tip**
  
  Wireless networks that are password-protected display a “padlock” icon adjacent to the name.

4 If your network is password-protected, an on-screen keyboard appears. Use the keyboard to enter the network password.

5 After you submit your network password, your Insignia Roku TV displays progress messages as it connects to your wireless network, your local network, and the Internet.
6 Your Insignia Roku TV needs to know the local time zone so that it can correctly display time information about the program you are currently watching. If your Insignia Roku TV is unable to automatically determine the local time zone, it prompts you to choose your time zone from a list. Use the UP or DOWN buttons to highlight your time zone, and then press OK.

As soon as your Insignia Roku TV is able to connect to the Internet, it downloads and installs its first software update, and then restarts.

Tips
- Your Insignia Roku TV automatically checks for updates periodically. These updates provide new features and improve your overall experience with your Insignia Roku TV. After an update, you might notice that some options have moved, and that there are new options or features.
- You can download an updated User Guide that matches your Insignia Roku TV software version from the Insignia web site at: insigniaproducts.com/support.html
- To determine your current Insignia Roku TV software version, go to Settings > System > About after you complete Guided Setup.

After your Insignia Roku TV restarts, it displays the Activation screen:
8 Using a computer, tablet, or smartphone with an Internet connection, go to the web address displayed on the screen and enter the code that appears on your screen. After you log in or create your Roku account, your Insignia Roku TV gets an acknowledgement and adds your preexisting streaming channels, if any, to your Insignia Roku TV. This process is automatic and takes a few moments—a little longer if you already have a lot of streaming channels to add.

Tip
Streaming channels from all Roku devices associated with your account are synchronized periodically, so all of your Roku devices have the same streaming channels (subject to compatibility with the device).

Note
Channel availability is subject to change and not all content is available in countries or regions where Roku products are sold.

After it adds your selected streaming channels, your Insignia Roku TV helps you set up the devices that you’re connecting to it, such as a cable box, Blu-ray player, or game console:

Why do I need a Roku Account?
You need a Roku Channel Store account for several reasons.
• It links you, your Insignia Roku TV and your other Roku devices to the Roku Channel Store and billing service.
• Streaming content providers know that it’s OK to send content you request to your Insignia Roku TV.
• Roku can automatically send updates to your device.

Important: It doesn’t cost anything to use and maintain your Roku Channel Store account (other than the cost of the TV and Internet service). Roku is packed with hundreds of free channels. Adding a payment method now lets you easily rent/buy movies on demand, or try popular streaming channels.

9 Press OK or RIGHT to proceed:

Let’s set up devices >
10 Connect all the devices you plan to use with your Insignia Roku TV, turn them all on, and then select **Everything is plugged in and turned on**. Your Insignia Roku TV now takes you step by step through each of its inputs and asks what kind of device you have connected. On each input that has a connected and active device, you can see its picture and hear its sound.

![Guided Setup Diagram](image)

11 Press **UP** or **DOWN** to highlight the label you want to associate with the input, and the press **OK** to move on to the next input.

You’re done with Guided Setup.

**If your TV is connected to the Internet:** To ensure you have a great Roku TV experience, we’ll show you an introductory video filled with some great hints and tips. If you’re not interested, press **Q** on the remote control to exit the video and go to your Insignia Roku TV **Home** screen.

![Guided Setup Video](image)

When you finish Guided Setup, and whenever you press **Q** on the remote control, the **Home** screen greets you.

From here, you can explore everything your Insignia Roku TV has to offer. Press the arrow buttons to move around, and press **OK** to select a highlighted item. We’ve designed your Insignia Roku TV to encourage you to explore, and you can probably figure out most of the capabilities and settings on your own. If you have any questions or difficulties, you can find answers and solutions in this guide.

If you find yourself a long way from the **Home** screen, you can always get back right away by pressing one button: **Q**.

• Change the screen theme by going to Settings > Themes to find and pick one to suit your mood.
Non-connected Insignia Roku TV Home screen

Here is a typical Home screen from an Insignia Roku TV that is not connected to the Internet.

Personalize your Home screen

You can do a lot to personalize your Home screen and make it just right for you and your family:

• Remove a tile by highlighting it and pressing OK. Then highlight Remove input and press OK. Use the arrow buttons to move the tile, and then press OK to lock it in its new position.
• Rename a tile by highlighting it and pressing OK. Then highlight Rename input and press OK. Highlight a new name in the list, and then press OK to assign that name to the tile.
• Add streaming channels by browsing the Roku Channel Store (after connecting your Insignia Roku TV to the Internet to add the Streaming Channels option to the menu).

Benefits of connecting

Connecting brings out your Insignia Roku TV’s full potential!

Enjoy FREE trials of popular channels
Your Insignia Roku TV comes loaded with special offers, including free trials from popular streaming channels Netflix, Spotify, Rdio, DailyBurn Fitness, and many more.
What is streaming?

Streaming is viewing or listening to video or audio content that is sent over the Internet, or located on a network-connected media server or on a USB device plugged into your Insignia Roku TV's USB port. With streaming, you can watch most programs on demand, when it's convenient for you. When streaming, you can play, pause, rewind, and fast forward whatever you are watching. You can also replay the last few seconds again, or turn on closed captions.

Your Insignia Roku TV lets you choose from thousands of streaming channels that offer a huge selection of entertainment:

• Thousands of movies and TV episodes
• Unlimited music, live and on-demand
• Tons of live and on-demand sports
• Commercial-free kids programming
• International programming in 22 languages
• 24x7 news and in-depth news commentary

Many streaming channels are free. Some streaming channels, like Cineplex and Amazon Instant Video, let you purchase or rent the latest movie releases or popular TV series. Some channels such as Netflix or Spotify charge a monthly subscription fee and others are free if you subscribe to a companion service through your cable or satellite provider. For example, HBO subscribers with participating broadcast TV provider accounts can add the HBO Go channel and watch it for free.

If you have an existing subscription to a service like Netflix or Spotify, you can just sign in with your existing user name and password. To play streaming content that is available on the Internet, you add streaming channels to your Home screen. To add a streaming channel to your Home screen, use the Streaming Channels option on the Home screen menu to go to the Roku Channel Store, and then select the streaming channel you want to add. The streaming channel is then added to your Home screen, and you can watch it at any time.

For more information on using the Roku Channel Store feature, see Using the Roku Channel Store on page 51.

But what if I didn’t connect my Insignia Roku TV?

What if you went through Guided Setup and chose Connect to the Internet later? No worries. Your Insignia Roku TV makes it easy to connect whenever you want. As you move around the Home screen, you'll see several places where you can start the connection process. For example:

• Now and then you'll see a message appear on the panel to the right of the Home screen offering a Connect Now option. Simply highlight and select the Connect Now option to get started.
• Use the Connect and activate now option in the Settings menu. From the Home screen menu, select Settings, then Network, and then Connect and activate now.
• If you want to start over from the beginning, use the Settings menu to do a Factory reset, and then go through Guided Setup again. This time, choose your home network when prompted.

Regardless of how you connect, the process is the same. If you need details, see Step 3 on page 6 under Setting up your Insignia Roku TV.

Tip

Subscription or other payment may be required to access certain content. Some content cannot be paused or skipped. For example, if you are viewing live programming or a program that is supported by ads, you generally are not allowed to skip the ads.

Note

Channel availability subject to change without notice. Some channels may not be available to all households in every market or in all countries where Roku TVs are sold.
Setting up Antenna TV

Despite all of the entertainment possibilities of your Insignia Roku TV, you may also want to watch broadcast TV. You
watch broadcast TV in much the same way you watch other entertainment choices. You select a tile—the Antenna TV
tile—from the Home screen.
The first time you select the Antenna TV tile, you have to set up the TV tuner. Setting up the TV tuner scans for active
channels and adds them to your broadcast TV channel list.

Why do I have to set up the TV tuner?

You might be asking, “Why is this step necessary?” Good question.
Not everyone needs to use the TV tuner. For example, you might have a set top box provided by a cable or satellite
company that receives all of your channels. Most of these set top boxes use an HDMI® connection.
More and more people are watching only streaming TV and do not have a TV antenna or cable/satellite service. If you
don’t need the TV tuner, you can bypass setting it up and instead remove it from the Home screen as explained in
Remove unwanted tiles on page 54.

When you set up Antenna TV, your Insignia Roku TV scans the signals on its antenna input for channels with a good
signal, and adds those to the channel list, skipping dead channels and channels with a very weak signal.

Your Insignia Roku TV will, however, let you add two analog channels, even if they have no signal. You might need to
add these channels if you have an older set top box, VCR, or game console that can only output a signal on analog
channel 3 or 4. These are the only channels that can be added regardless of whether they have a good signal. Typically,
you’ll only need one of these channels, but both are provided to make setup simpler. You can hide the one you don’t
want as explained in Edit broadcast TV channel lineup on page 53.

How do I set up the TV tuner?

Setting up the TV tuner is easy—your Insignia Roku TV does most of the work. You just have to answer a couple of
questions.
1. Make sure your antenna (sold separately) or TV cable is connected to your Insignia Roku TV’s ANT/CABLE input.
2. On the Home screen, select the Antenna TV tile.
3. Read the simple on-screen instructions and select Start setup.

If prompted, select your time zone. You’ll only need to do this if your Insignia Roku TV can’t figure out your time zone
from your Internet connection.
5 When prompted, select whether to add analog channels 3 and 4 (to enable you to connect older set top boxes, VCRs, or game consoles).

6 Wait while your Insignia Roku TV scans for broadcast (antenna TV) stations...

... and then cable TV channels.

**Tip**

Cable TV channels are channels from a cable TV provider that you can receive by connecting their cable directly to your Insignia Roku TV (unscrambled NTSC, ATSC, and QAM channels, if you're the kind of person who is interested in the details). In many cases, your cable provider probably requires you to use their set-top box and connect it to a different input, and then use the set-top box to tune your cable stations. In that case, you can skip scanning for cable channels.
When the channel scans finish, your Insignia Roku TV shows the number of channels it added.

Scanning for channels can take several minutes.

Tip
Repeat the channel scan from time to time to make sure you are receiving all of the latest channels. Broadcasters add and remove channels, move channels to different parts of the spectrum, and change the power levels of their channels periodically.

Note
You'll have to repeat the channel scan if you remove the Antenna TV tile from the Home screen or perform a factory reset. To repeat the channel scan at any time, go to Settings > TV inputs > Antenna TV > Scan again for channels. Your antenna reception and picture quality depend on the position of your antenna and on your location relative to the antennas of broadcasters in your area.

Now, you're ready to watch broadcast TV! While you're watching, try the following:

• Press UP or DOWN to change channels.
• Press RIGHT to display the channel list and then use UP or DOWN to select a channel to watch. Or press REWIND or FAST FORWARD to jump through the channel list a page at a time.
• Press OK to display information about the current program.
• Press \ to switch to the previously tuned channel.
• Press \ to see options for picture and sound settings.

Note
If \ is not available on your remote control, you can use \ on the Roku mobile app or the Jump Back button on a universal remote. For more information, see Other devices on page 66. Insignia Roku TV remote control on page 13 has more information on using the remote control buttons while watching TV.

Standby mode energy savings

About 10 minutes after you turn off your Insignia Roku TV, it goes into a very low power standby mode. Until that happens, if you turn on your Insignia Roku TV again, it immediately displays the activity you selected in the Power on settings, as described in Power on settings on page 55. After your Insignia Roku TV goes into the low power standby mode, it takes a bit longer to start up.

Watching broadcast TV channels

To watch broadcast TV, select the Antenna TV tile in the Home screen. Your Insignia Roku TV remembers the last channel you watched and starts with that channel playing.

Tip

You also can use the buttons on the TV panel to select Antenna TV, as explained in Buttons on page 11.

Changing channels

To change channels, you can do any of the following:

- Press UP to change to the next higher channel.
- Press DOWN to change to the next lower channel.
- Press LEFT to display the channel list, and then press UP or DOWN to move the highlight through the list one channel at a time. Or press REWIND and FAST FORWARD to move the highlight through the list one page at a time. When you've highlighted the channel you want to watch, press OK. (If you decide you don't want to change channels, press RIGHT or BACK).
- Press \( \text{ } \) to switch to the previously tuned channel.

Note

If \( \text{ } \) is not available on your remote control, you can use \( \text{ } \) on the Roku mobile app or the Jump Back button on a universal remote. For more information, see Other devices on page 66.
**Viewing program information**

To view information about the current program, press **OK**. Your Insignia Roku TV displays a banner at the bottom of the screen with as much information as is available in the program data stream.

Program information, subject to availability, includes:

- Channel number
- Channel call sign
- Signal strength
- Program title
- Start time, end time, and graph of program length showing current position
- Content rating
- Video resolution (480i, 480p, 720p, 1080i, 1080p)

**Adjusting settings**

Press **** to display the **Options** menu. Press **UP** or **DOWN** to highlight an option, and then press **LEFT** or **RIGHT** to change the setting. **Adjusting Insignia Roku TV settings** on page 47 explains each of the settings in detail.

**Switching TV inputs**

Switch to a TV input to access the device connected to that input, for example, a Blu-ray player. Switching inputs is as simple as highlighting the input's tile in the **Home** screen, and pressing **OK**. The video signal on the input, if any, appears on the screen.

**Auto-detecting devices**

Your Insignia Roku TV automatically detects when you connect a new device to an HDMI input and turn on its power. The input is automatically added to the **Home** screen if it isn't already present.

**Adjusting audio/video settings**

While watching video content on any input, press **** to display the Options menu. Press **UP** or **DOWN** to highlight an option, and then press **LEFT** or **RIGHT** to change the setting. **Adjusting Insignia Roku TV settings** on page 47 explains each of the settings in detail.
Playing content from USB storage devices

Your Insignia Roku TV has a USB port that can be used to play personal music, video, and photo files from a USB flash drive or hard disk. If your Insignia Roku TV is connected to the Internet, your Home screen has the Roku Media Player tile. If your Insignia Roku TV has not been connected to the Internet, the Home screen has the USB Media Player tile.

To use this feature, first make sure your media files are compatible with the Roku/USB Media Player. As of the publication date of this guide, the following media file formats are supported:

- **Video**—MKV (H.264/262), MP4, MOV (H.264)
- **Music**—AAC, MP3, WMA, WAV (PCM), AIFF, FLAC, AC3, and DTS
- **Photo**—JPG, PNG (up to 4k x 4k pixels), GIF (up to 4k x 4k pixels)

To see the latest list of supported formats, view Help in the Media Player.

Notes:
- The Roku/USB Media Player displays supported file types only, and hides file types it knows it cannot play.
- There are many variants of each of these media formats. Some variants may not play at all or may have issues or inconsistencies during playback.
- DTS audio, whether in music or video files, is supported only by pass-through, meaning that your Insignia Roku TV cannot directly output the sound of a DTS file, but can pass it through to a DTS-compatible receiver that is connected to the HDMI ARC or S/PDIF connector on your Insignia Roku TV.

Playing content from local network media servers

If you have connected your Insignia Roku TV to a network, it can play personal video, music, and photo files from a media server on your local network. Media servers include personal computers running media server software such as Plex or Windows Media Player, network file storage systems that have built-in media server software, and other devices that implement the specifications of the Digital Living Network Alliance. Some servers do not fully implement the DLNA specification but are UPnP (Universal Plug and Play) compatible. The Roku Media Player will connect to them as well.

Some media servers can convert files into Roku compatible formats. DRM-protected content is not supported.

Adjusting Insignia Roku TV settings

You can adjust most picture and sound settings while you are watching a program by pressing **Options** to display the Options menu. If you don’t find what you need, there are additional picture and sound settings in the Settings menu.

In most cases, the changes you make apply only to the input you are using. Antenna TV, each separate HDMI input, and the AV input have their own settings that your Insignia Roku TV remembers when you return to that input. Your Insignia Roku TV also remembers the settings you specify while viewing streaming content.

Settings menu

Use the Settings menu to adjust overall TV settings. Press **Options** to go to the Home screen, and then navigate to Settings>TV picture settings.

You can adjust the following overall TV picture settings from the Settings screen:

- **TV brightness**—If the lighting level in your TV room changes, use this setting to help provide a better viewing experience: set to darker for a darker room, and brighter for a brighter room. Choose among Normal and four other settings to make the overall picture brighter or darker. So that you don’t have to make this type of change for each TV input one at a time, this setting increases or decreases your Insignia Roku TV’s general brightness across all TV inputs.

Note:
- This setting is identical to the TV brightness setting you can access in the Options menu while watching a program.

- **Settings per input**—This section of options lists each TV input. Select an input to switch to that input. Then press **Options** to display the Options menu, where you can adjust the input’s settings while watching a live picture and listening to the sound from that input.

Tip:
- You don’t have to go to the Settings menu first—you can display an input’s Options menu and adjust its settings whenever you are watching the input by pressing **Options**.
Options menu

The Options menu for each TV input provides settings for controlling the appearance of the picture and the quality of the audio.

To view the Options menu, press \( \text{Menu} \) whenever you are watching a TV input or streaming a video. The Options menu is a panel that appears over the left side of the screen:

![Options menu panel](image)

To adjust the settings on the Options menu, press \( \text{UP} \) or \( \text{DOWN} \) to highlight a setting, and then press \( \text{LEFT} \) or \( \text{RIGHT} \) to change the setting. You’ll notice the changes you make right away in picture appearance or audio quality.

Options menu settings

- **TV brightness** — Affects the overall brightness of the picture. This setting applies across your entire Insignia Roku TV; that is, to all TV inputs and is identical to the TV brightness setting in the TV picture settings menu.
- **Picture mode** — Provides picture presets for various viewing preferences. This setting applies to the currently-selected input only.
- **Audio mode** — Adjusts the sound quality output from the your Insignia Roku TV speakers. This setting applies across your entire Insignia Roku TV; that is, to all TV inputs. It does not affect the sound quality for headphones, HDMI (ARC), or SPDIF (TOSLINK) connectors.
- **Sleep timer** — Sets a timer that turns off your Insignia Roku TV after the specific amount of time. This setting remains in effect even if you stop watching the current input.
- **Closed captioning** — Controls when you see captions. This setting is only offered for Antenna TV, the AV input, and streaming videos. Any set value remains in effect across only these inputs.
  - **Antenna TV** — Turn captions on or off, or set them to appear only when your Insignia Roku TV sound is muted.
  - **AV input** — Turn captions on or off, or set them to appear only when your Insignia Roku TV sound is muted.
  - **Streaming video channel** — Turn captions on or off, set them to appear only when your Insignia Roku TV sound is muted, or only during instant replay (for streaming content that supports instant replay).
- **Captioning track** — Selects which caption track to display when Closed Captioning is on. This setting remains in effect on all inputs that provide captions.
- **SAP** — Selects whether to play a secondary audio program or multichannel television sound, and which choice to play. This setting applies only to Antenna TV on digital channels.

Tip

When you highlight a setting, the header text explains the effect of its current value. When you begin to adjust a setting, the other options are hidden so you can see more of the screen. Even though the other settings are hidden, you can move the highlight up or down to adjust the other settings.

Tip

If the Instant Replay button is not available on your remote control, you can use \( \text{CONTINUE} \) on the Roku mobile app or the Jump Back button on a universal remote. For more information, see Other devices on page 66. Additional captioning options are provided in the Captions screen in Settings.

Tip

To dismiss the Options menu, just wait a few seconds without pressing any buttons. Or press \( \text{Menu} \) again to dismiss the menu immediately.
Advanced picture settings

The Advanced picture settings menu for each TV input provides settings for fine tuning the appearance of the picture. All of the settings in this menu apply only to the currently-selected input.

To use the Advanced picture settings menu, first press \( \text{Options} \) to display the Options menu. Then select Advanced picture settings.

To adjust the settings on the Advanced picture settings menu, press \( \text{UP} \) or \( \text{DOWN} \) to highlight a setting, and then press \( \text{LEFT} \) or \( \text{RIGHT} \) to change the setting. You’ll notice the changes you make right away in picture appearance.

**Tip**

When you highlight a setting, the header text explains the effect of its current value. When you begin to adjust a setting, the other options are hidden so you can see more of the screen. Even though the other settings are hidden, you can move the highlight up or down to adjust the other settings. As soon as you press \( \text{UP} \) or \( \text{DOWN} \), the other settings become visible again.

**Advanced picture settings menu options**

- **Picture mode**—Provides picture presets for various viewing preferences. This setting duplicates the one on the Options menu. When you change the Picture mode, other picture settings adjust accordingly. For example, setting the Picture mode to Vivid sets Brightness, Contrast, Sharpness, and other values to produce a very vibrant picture. Setting Picture mode to Movie changes these same settings to produce a picture suitable for enjoying movies in a darkened room. If you make changes to the individual picture settings—for example, Contrast, or Sharpness—these settings are saved for the current input and the current picture mode. In this way, the HDMI 1 input’s Movie picture mode can be customized and different than the HDMI 2 input’s Movie picture mode and Antenna TV’s Movie picture mode. Use Reset picture settings, described below, to return the input’s current picture mode to its original values.
- **Dynamic Contrast**—Automatically adjusts the backlight level to achieve the optimum contrast and prevent excessive differences between light and dark areas of the screen. The Backlight option is disabled when Dynamic Contrast is enabled.
- **Backlight**—Adjusts the overall light intensity of the screen.
- **Brightness**—Adjusts the dark level of the black areas of the picture.
- **Contrast**—Adjusts the white level of the light areas of the picture.
- **Sharpness**—Adjusts the sharpness of the edges of objects in the picture.
- **Color**—Adjusts the intensity of colors in the picture. A setting of 0 removes all color and displays a black and white picture.
- **Tint**—Adjusts the color balance from green to red to obtain accurate colors in the picture.
- **Color temperature**—Adjusts the overall colors in the picture from Normal to slightly more bluish (Cool) to slightly more reddish (Warm).
- **Picture size**—Adjusts the aspect ratio of the picture, enabling you to view a picture in its original format, or zoom or stretch it to fill the screen. The Auto setting has been known to produce the best picture in most cases.
- **Game mode**—Controls whether Game mode is on or off. When On, your Insignia Roku TV performs less image processing and has less input lag. When Off, your Insignia Roku TV may perform more image processing and has more input lag, which is less desirable for action games. Available only for HDMI and AV inputs.
- **Reset picture settings**—Returns all picture settings for the input’s currently-selected Picture mode to their original values.

**Tip**

To dismiss the Advanced picture settings menu, just wait a few seconds without pressing any buttons. Or press \( \text{Options} \) again to dismiss the menu immediately.
The Roku Feed

Use The Roku Feed to find out when you can watch upcoming movies. The Roku Feed gives you updates on the movies coming soon to theaters that interest you the most. With The Roku Feed, you’ll know when your favorite movie is ready to stream, the channels it is on, and how much it will cost. You also will be alerted any time a movie becomes available on another channel and whenever its price changes. When you see a movie that interests you, you can select **Follow** this movie on Roku to add it to **My Feed**.

Searching for movies & shows

Searching for movies and shows across multiple streaming channels is one of the unique features of your Insignia Roku TV. Within a single search operation, you can search by:
- Movie name
- TV show name
- Actor or director name
- Streaming channel name
- Game name

| Tip | The Roku Feed is available only if your Insignia Roku TV is connected to the Internet. |

Roku Search doesn’t search across all streaming channels, but searches across lots of popular streaming channels. The actual channels it searches vary by locale, but include popular providers such as Netflix and several others, with more being added all the time.

You can check which streaming channels are included in Roku Search by going to the Search screen, clearing all previous searches to reveal the search instructions, and then watching the channel tiles cycle at the bottom of the screen.

To search, select **Search** on the **Home** screen menu. The Search screen has a keyboard grid and initially displays instructions—a set of icons representing search categories and a list of participating provider tiles.

| Tip | If you don’t see the instructions, navigate to the end of the list of recent searches and select **Clear recent search selections**. |

How do I search?

To search, use the arrow buttons to enter a few characters of the search term. With each additional character you enter, you narrow down the search and the search results become more relevant.

| Tip | Use the free Roku mobile app on your smartphone or tablet to make searching even faster. Not only can you use your device’s keypad to type, you can search simply by touching a voice search icon and saying the name of the movie, TV show, actor or director, channel, or game. |

An icon next to each search result shows the category of the result (movie, TV show, actor).
- Press **RIGHT** to highlight the search results.
- Press **UP** or **DOWN** to scroll through the list of search results to highlight the item you want to view.
I found a show, now what?

Now that you’ve highlighted the show, movie, actor, game, or streaming channel you were looking for, press RIGHT. If your search result was an actor, director, or other item that does not represent a single item of content, you’ll see another list to narrow down your search. Continue highlighting results and pressing RIGHT until you find a single, viewable content item.

An HD logo means that the content is available in high-definition. The checked circle adjacent to the title means you have already added the streaming channels.

When you narrow down your search to a game or streaming channel, you’ll see detailed information, images, and available actions such a list of streaming channels and the cost of getting the item on each channel.

The next time you use Roku Search, the Search screen displays a list of recent search selections in place of the search instructions.

Using the recent search selections list makes it easy to quickly get to a previously found item, for example, to find another movie with the same actor, or another TV show in the same series.

Using the Roku Channel Store

The Streaming Channels menu option takes you to the Roku Channel store, where you can add new streaming channels to your Insignia Roku TV.

Tips

- The Streaming Channels menu option is available only if your Insignia Roku TV is connected to the Internet.
- You also can search for streaming channels by using the Search option, as explained in Searching for movies & shows on page 50.

To make it easier to find what you want, the streaming channels in the Roku Channel Store are categorized by topic. Press UP or DOWN to highlight the category you want, and then press RIGHT to move the highlight into the grid of streaming channel tiles.

When you find a streaming channel you want to add or learn more about, highlight it and press OK to display more details.

- If the streaming channel you are adding is free, you can select Go to channel to start watching it immediately.
- If there is a one-time or recurring fee associated with using the streaming channel, you must agree to the terms and conditions, accept the fee, and-if you created one when you activated your Insignia Roku TV, enter your Roku PIN code to authorize the charges.
- If you already have a subscription to the streaming channel-for example, you already subscribe to Netflix or you receive HBO through your cable TV provider-you must complete a different, simple authorization step to add the streaming channel.

You only have to complete the authorization or activation step one time, when you initially add the streaming channel. After that, you simply select the streaming channel tile from your Home screen to start watching. (Channel availability is subject to change.)

Tip

New streaming channels are added continuously, so be sure to check back every now and then.
Customizing your Insignia Roku TV

There are several things you can do to personalize your Insignia Roku TV.

Rearrange tiles

Whenever you add a TV input tile, it’s added at the top of your Home screen. Whenever you add a new streaming channel from the Roku Channel Store, it’s added at the bottom of your Home screen.

You can easily rearrange the order of the tiles on the Home screen to suit your viewing preferences. For example, you might want Antenna TV to be the first tile in your Home screen. But if you mostly watch one streaming channel, you might want its tile to be the first one on your Home screen.

Rearranging tiles is easy:
1. From the Home screen, highlight one of the tiles you want to move.
2. Press 
3. Select Move input. The list of options disappears and the highlighted tile shows arrows indicating how it can be moved.
4. Use the arrow buttons to move the highlighted tile to its new position. As you move the tile, it pushes other tiles out of its way.
5. Press OK to lock the tile into its new position.
6. Repeat these steps to move other tiles until you have arranged your Home screen to your liking.
Edit broadcast TV channel lineup

When you set up the TV tuner as described in Setting up Antenna TV on page 42, your Insignia Roku TV adds all the channels with good signals that it could detect in your area. It’s likely that you now have more channels than you want in your channel list.

To edit the channel lineup, from the Home screen, navigate to Settings>TV inputs>Antenna TV>Edit channel lineup. You’ll see a screen listing all of your channels. Adjacent to the list of channels is a miniature TV screen playing the highlighted channel’s picture and sound.

Highlight each channel you want to hide, and then press OK to hide the channel.

Tip

If you need to see or hear the highlighted channel, wait a couple of seconds for your Insignia Roku TV to start playing the channel’s picture and sound. Also note that if you’ve enabled parental controls and the program on the current channel is blocked, you won’t see a picture or hear sound while editing the channel lineup.
Rename inputs

Rather than trying to remember that your Blu-ray player is connected to HDMI 1 and your game console is connected to HDMI 3, you can rename the TV inputs to match the connected component.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>Renaming an input also changes the icon associated with it.</td>
</tr>
</tbody>
</table>

To rename an input, you can either:

- Highlight the input tile in the Home screen, and then press \( \star \) to display a list of options. From the list of options, select Rename input. Then select a new name and icon.

Or

- From the Home screen, navigate to Settings>TV inputs. On the TV inputs screen, select the input you want to rename, select Rename, and then choose a new name and icon from the provided list.

Press \( \backslash \) to return to the Home screen. The new name and icon are now in effect.

Remove unwanted tiles

It’s easy to remove unused TV inputs and unwanted channel or app tiles. For example, if you never use the HDMI 3 input, or if you don’t like the weather app you added from the Roku Channel Store, you can remove them from your Home screen.

You also can remove the Antenna TV tile if you never use the TV tuner. But be aware that removing the Antenna TV tile also deletes the broadcast TV channel list. You’ll have to set up the TV tuner again next time you add it. Instructions for setting up the TV tuner can be found in Setting up Antenna TV on page 42.

- To remove any tile, highlight the input tile in the Home screen, and then press \( \star \) to display a list of options. From the list of options, select Remove input. In the screen that follows, confirm you want to remove the input.

- Alternatively, to remove a TV input tile from the Home screen, navigate to Settings > TV inputs. On the TV inputs screen, select the input you want to remove, and then select Remove > Confirm. Then press \( \backslash \) to return to the Home screen.

Change themes

Another way to customize your Insignia Roku TV is to change its theme. The theme establishes the look and feel of your Insignia Roku TV through colors, designs, and fonts.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>Themes are available only when your Insignia Roku TV is connected to the Internet.</td>
</tr>
</tbody>
</table>

To change the theme, in the Home screen menu navigate to Settings>Themes. In the Themes screen, choose from the following options:

- **My themes**—Highlight a theme, and then press OK to switch to that theme.

- **Custom settings**—Turn Featured themes on or off. When Featured themes is on, your Insignia Roku TV automatically switches to featured themes—like certain holidays—for a limited time whenever Roku makes them available, and then switches back to your selected theme when the featured theme expires. When off, your Insignia Roku TV always uses your selected theme.

Change sound effects volume

Sound effects are the noises your Insignia Roku TV makes to let you know it received your command. You can change the volume of sound effects or turn them off.

To adjust the sound effects volume, in the Home screen menu, navigate to Audio>Menu volume. Navigate to the right and then change the setting to High, Medium, Low, or Off.
Configure power settings

Power settings let you set up your Insignia Roku TV so that it turns on to the location you choose. Power settings also help your Insignia Roku TV save energy by automatically turning it off under certain conditions.

Power on settings

Power on settings tell your Insignia Roku TV what to do when you turn on the power. To configure the power on settings, from the Home screen menu, navigate to Settings > System > Power > Power on. Highlight the power on location from the list, and then press OK to select it.

Auto power off settings

To help you save energy, your Insignia Roku TV can automatically turn itself off after a period of inactivity or a period during which no signal has been detected. It is factory-configured to do both of these things, but you can change these settings if needed.

To configure automatic power off, from the Home screen menu navigate to Settings > System > Power > Auto power off. In the Power settings screen, highlight the following options and press OK to turn them on or off:

- After 15 minutes of no signal—if no signal is detected on a TV input for 15 minutes, your Insignia Roku TV automatically powers off.
- After 4 hours of no interaction—if no remote control or panel button is pressed for 4 hours and your Insignia Roku TV is not displaying a TV signal or streaming a video, your Insignia Roku TV is automatically powered off.

Configure parental controls

Parental controls enable you to control whether the members of your household can view certain kinds of broadcast TV programs. When a program or feature is blocked, you can unblock it by entering a parental control PIN that only you know.

Creating a parental control PIN

The first time you access the Parental controls screen, you must create a new parental control PIN. Thereafter, whenever you want to change parental control settings, unblock programming that has been blocked, change the PIN, or disable parental controls, you must enter your parental control PIN.

To create a new parental control PIN, from the Home screen menu navigate to Settings > Parental controls. The screen displays a numeric keypad. Use the arrow buttons and the OK button to enter a four digit code. Then repeat the process to enter the same PIN again, just to make sure you correctly entered the PIN you want to use.

Important

If you forget your PIN, the only way to recover is to perform a factory reset operation, as explained in Factory reset everything on page 64. Be sure to write it down in a safe place just in case.
Blocking Broadcast TV shows

For broadcast TV, parental controls use information embedded in the broadcast signal to determine whether to allow a program to be displayed. Parents can configure parental controls to block broadcast TV programs that meet or exceed a specific rating, so they cannot be viewed or heard unless the correct parental control PIN is entered.

Enabling parental control of TV shows

The first step in blocking TV shows is to enable parental control of TV shows.

This setting is provided separately to make it easier for you to turn parental control of TV shows on and off without disturbing their settings. For example, your kids are going to summer camp for two weeks, and while they are gone, you don’t want to have to deal with unblocking shows that you want to watch by entering your PIN. All you need to do is clear Enable parental controls, and all TV shows are unblocked. When the kids return, select Enable parental controls again, and all of your parental control settings are restored in a single operation.

To enable parental control of TV shows:

1. In the Home screen menu, navigate to Settings > Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner > Parental control of TV shows.
3. Make sure the check box next to Enable parental controls is checked. If not, highlight it and press OK.

Blocking based on US TV ratings

Most broadcast US TV shows—other than movies—contain rating data that enables parental controls to block shows that parents don’t want others to view. The ratings are divided into two groups that function independently:

- You group—TV-Y, TV-Y7
- Main group—TV-G, TV-PG, TV-14, TV-MA

Within each of these groups, the ratings interact such that if you block a particular level of content, your Insignia Roku TV also blocks all content with a higher rating. Conversely, if you unblock a particular level of content, your Insignia Roku TV also unblocks all content with a lower rating. For example, if you block TV-PG programs, your Insignia Roku TV also blocks TV-14 and TV-MA programs. If you subsequently unblock TV-14 programs, TV-PG programs are also unblocked, but TV-MA programs remain blocked.

Similarly, within the main group, content types can be individually blocked. For example, you can block just coarse language in shows with a TV-PG rating. If you do, then your Insignia Roku TV also blocks shows with coarse language in the higher ratings (TV-14 and TV-MA). Subsequently unblocking coarse language in TV-14 ratings does not unblock coarse language in TV-MA programs, but it does unblock coarse language in TV-PG programs.

To block TV shows based on US television ratings:

1. From the Home screen menu, navigate to Settings > Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner > TV ratings. Choose among the following settings:
   - Entire ratings—Highlight the rating you want to block, and then navigate to the right and select the first option that blocks the entire rating level (and all higher rating levels).
   - Individual content types—Highlight the rating that contains the content type you want to block, and then select the content types you want to block from among those listed. Remember that blocking a content type in one rating blocks the equivalent content type in all higher rating levels.
Blocking based on US movie ratings
Most movies in the US are rated by the Motion Picture Association of America, or MPAA, so the ratings are known as MPAA ratings. TV broadcast signals carry movie rating data that enables parental controls to block shows that parents don’t want others to see. The ratings are:

- **G**—General audiences
- **PG**—Parental guidance suggested
- **PG-13**—Parents strongly cautioned for children age 13 or younger
- **R**—Restricted
- **NC-17**—Not for age 17 or younger

Unlike US TV ratings, there are no individual content types within the ratings. But like TV ratings, blocking movies with a particular rating also blocks movies with a higher rating, and unblocking movies with a particular rating also unblocks movies with a lower rating.

<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blocking movies with an NC-17 rating also blocks programs with the now-obsolete X rating, which can still occur in the program data of older movies.</td>
</tr>
</tbody>
</table>

To block movies based on MPAA ratings:
1. From the **Home** screen menu, navigate to **Settings >Parental controls**, and then enter your PIN.
2. In the **Parental controls** screen, navigate to **TV Tuner>Movie ratings**.
3. Select the rating level you want to block. You need only select one rating level, and all higher levels are automatically blocked.

Blocking based on Other ratings
Your Insignia Roku TV can block programs having ratings that had not been defined when your Insignia Roku TV was manufactured. It does this by detecting a new Rating Region Table in a program and then downloading the new table and displaying its rating in the Parental controls.

When your Insignia Roku TV downloads a new Rating Region Table, it adds a new option to the list of rating types: **Other ratings**. If you see this option in the Parental controls screen, you have tuned to a station that has implemented a new rating table. Once the new rating table has been downloaded to your Insignia Roku TV, it remains in your Insignia Roku TV until it is factory reset, and you can configure blocking based on the new ratings.

New Region Rating Tables can have independent rating levels, or rating levels that interact in the same ways as the built-in US TV and MPAA Movie ratings.

Blocking based on Canadian English ratings
Canadian-English language and third-language programs that are broadcast in Canada are rated by the Action Group on Violence on Television, or AGVOT. TV broadcast signals carry rating data that enables parental controls to block shows that parents don’t want others to view based on content containing violence, language, sex, or nudity. The ratings are:

- **C**—Children under 8 years
- **C8**—Children 8 years and older
- **G**—Generally suitable for all age groups
- **G—Parental guidance suggested for viewers under 14 years**
- **14+**—Generally not suitable for viewers under 14 years
- **18+**—Generally not suitable for viewers under 18 years

Blocking content with a particular rating also blocks content with a higher rating, and unblocking content with a particular rating also unblocks movies with a lower rating.

To block programs based on AGVOT ratings:
1. From the **Home** screen menu, navigate to **Settings >Parental controls**, and then enter your PIN.
2. In the **Parental controls** screen, navigate to **TV Tuner>Canadian English ratings**.
3. Select the rating level you want to block. You need only select one rating level, and all higher levels are automatically blocked.

Tip
Blocking movies with an NC-17 rating also blocks programs with the now-obsolete X rating, which can still occur in the program data of older movies.
Blocking based on Canadian French ratings

Canadian-French language programs that are broadcast in Canada are rated by the Régie du cinéma du Québec. TV broadcast signals carry rating data that enables parental controls to block shows that parents don’t want others to view based on content containing violence, language, sex, or nudity. The ratings are:

- G - Generally suitable for all age groups
- 8+—Viewers 8 years and older
- 13+—Viewers 13 years and older
- 16+—Viewers 16 years and older
- 18+—Adults only

Blocking content with a particular rating also blocks content with a higher rating, and unblocking content with a particular rating also unblocks movies with a lower rating.

To block programs based on Canadian-French ratings:

1. From the Home screen menu, navigate to Settings > Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner > Canadian French ratings.
3. Select the rating level you want to block. You need only select one rating level, and all higher levels are automatically blocked.

Blocking unrated programs

Some broadcast TV shows and movies are assigned a rating of “Unrated”. Whether or not such programs contain content that is objectionable to you cannot be determined. However, you can choose to block such programs.

To block all unrated broadcasts:

1. From the Home screen menu, navigate to Settings > Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner > Block all unrated programs.
3. Highlight Block and press OK. When blocking is enabled, the adjacent padlock icon changes from unlocked to locked.

Tip

Blocking programs that have been assigned a rating of “Unrated” does not block programs that have no rating assigned to them (for example a broadcast of a local town council meeting). Programs that do not have an assigned rating display Rating NA (for “not applicable,” meaning a rating is not needed). Programs that have no assigned rating are considered “safe”; therefore, there is no need to block them.

What happens when a TV show is blocked?

After you’ve set up parental controls, TV shows and movies can be blocked:

- When you change channels and the new channel is playing a program whose rating exceeds your settings.
- When a new show comes on the channel you are watching and its rating exceeds your settings.

When a program is blocked by parental control settings, your Insignia Roku TV displays a blocked message:

Whenever this blocked message appears, both the video and audio of the show are blocked, as well as program data that would normally appear in the area at the bottom of the screen.
To watch the blocked program, you need to know the PIN code defined when you enabled parental controls, as explained in Creating a parental control PIN on page 55.

1. Press OK to select Unblock and display a PIN pad.

2. Use the arrow buttons to enter your PIN code, and then press OK to select Unblock everything. After unblocking shows that have been blocked, all blocking is disabled for two hours or until you turn off your Insignia Roku TV.

Changing the parental control PIN
To change your parental control PIN:
1. From the Home screen menu, navigate to Settings >Parental controls, and then enter your PIN.
2. In the Parental controls screen, highlight Change PIN.
3. Move the highlight into the adjacent keypad, and then use the arrow buttons and the OK button to enter a four digit code. Then repeat the process to enter the same PIN again, just to make sure you correctly entered the PIN you want to use.

Resetting parental controls
So now your kids have grown up and gone away to college, and you no longer want to deal with blocked programs. To erase all parental control settings:
1. From the Home screen menu, navigate to Settings >Parental controls, and then enter your PIN.
2. In the Parental controls screen, highlight Reset parental controls.
3. Follow the instructions on the screen to confirm that you want to erase all parental control settings.

Tip
Resetting parental controls also erases your parental control PIN.
More settings

This section describes the features and settings of your Insignia Roku TV that were not covered in the other parts of this guide.

Changing network settings

If needed, you can change your network settings at any time. For example, if you change the name of your wireless network (its SSID) or its password, you will need to change your Insignia Roku TV’s settings so that it can continue to connect. Also, if you decided not to connect to the Internet in Guided Setup on page 33, you can use Network settings to connect at a later time.

To change network settings, from the Home screen menu, navigate to Settings > Network, and then press RIGHT. At this point, you can choose the following options:

- Update connection—Press OK to start the update process. Your Insignia Roku TV uses your current wireless network name and password to reconfirm the wireless connection, the local network connection, and the Internet connection.
- Set up new Wi-Fi connection—Press OK to start a scan for wireless networks. Your Insignia Roku TV scans for the wireless networks within range and displays the first few it finds in order, with the strongest signals first. In addition to your own wireless signal, your Insignia Roku TV might pick up signals from your neighbors. Now you can do one of the following:
  - Select your network name—Select the name of your network and then enter your wireless password if requested.
  - Scan again—if you don’t see your wireless network name in the list, select Scan again to list all networks in range. The first scan listed only the first few, strongest wireless signals. The second scan sometimes results in a longer list. If you still don’t see your network name, you might need to adjust the location of the wireless router or your Insignia Roku TV, turn on your router, or make other changes. When everything is ready, select Scan again to repeat the network scan.
  - Private network—if your wireless network name is hidden, it won’t appear in the list. Select Private network to display an on-screen keyboard, and use it to enter your network name. Unless you changed the factory-set network name, you can find the name (also called SSID) on a label on the router.

Note

Highlighting Scan Again displays an informational panel with the unique media access control (MAC) address of your Insignia Roku TV. You will need the MAC address if your wireless router is configured to use MAC address filtering.

Wireless networks that are password-protected display a “padlock” icon adjacent to the name.
Changing caption settings

You can change many different settings that affect the appearance of captions. To change caption settings, from the Home screen menu, navigate to Settings > Captions, and then press RIGHT. At this point, you can choose the following options:

- **Captions mode**—Choose Off, On, When mute, or Instant replay.
  - If you choose On, your Insignia Roku TV displays captions whenever they are available in the program information. This setting applies to Antenna TV, the AV input, and streaming channels.
  - If you choose When mute, your Insignia Roku TV displays captions only when the sound is muted. This setting applies to Antenna TV, the AV input, and streaming channels.
  - If you choose Instant Replay, your Insignia Roku TV displays captions only during a replay operation; that is, after pressing \( \) to jump back a few seconds in streaming video. This setting applies only to streaming channels when the program being streamed supports instant replay.

- **Text style**—Choose from a list of fonts. As you move the highlight to each font, you can see a sample of the result in an adjacent panel.
- **Text edge effect**—Choose from a list of edge effect styles, such as raised, depressed, and various shadows. As you move the highlight to each effect, you can see a sample of the result in an adjacent panel.
- **Text size**—Choose from a list of sizes. As you move the highlight to each size, you can see a sample of the result in an adjacent panel.
- **Text color**—Choose from a list of colors for the text. As you move the highlight to each color, you can see a sample of the result in an adjacent panel.
- **Text opacity**—Choose from a list of opacity settings for the text. This setting determines how much the area behind the text shows through the text. A value of 100% blocks all of the content behind the text. As you move the highlight to each setting, you can see a sample of the result in an adjacent panel.
- **Background color**—Choose from a list of colors for the background area behind the text. As you move the highlight to each color, you can see a sample of the result in an adjacent panel. Note that you won’t see any change unless you set the Background opacity to a value other than Off.
- **Background opacity**—Choose from a list of opacity settings for the background of the caption. This setting determines how much the area behind the caption background shows through the background. A value of 100% blocks all of the content behind the background. As you move the highlight to each setting, you can see a sample of the result in an adjacent panel.
- **Window color**—Choose from a list of colors for the window rectangle surrounding the entire caption. As you move the highlight to each color, you can see a sample of the result in an adjacent panel. Note that you won’t see any change unless you set the Window opacity to a value other than Default or Off.
- **Window opacity**—Choose from a list of opacity settings for the window rectangle surrounding the entire caption. This setting determines how much the area behind the caption window shows through the window. A value of 100% blocks all of the content behind the window. As you move the highlight to each setting, you can see a sample of the result in an adjacent panel.

Note: Some streaming channels require you to enable captions through a setting within their channel even though you have turned on captions everywhere else.
Changing time settings

You can change time settings to suit your preferences. You can find the following settings by navigating from the Home screen menu to Settings > Time:

- **Sleep timer**—Set a time delay after which your Insignia Roku TV will automatically shut off. This setting reflects the setting you can make in the Options menu from any TV input, as explained in Options menu settings on page 48. Note that the sleep timer setting is not input specific.
- **Time zone**—Select whether to set the time zone automatically or manually, and if set manually, select your current time zone. Typically, a TV connected to the Internet can discover its own time zone automatically, and a TV that is not connected to the Internet must be set manually. Initially, this setting is made when you set up the TV tuner, as explained in Setting up Antenna TV on page 42. Correct time zone information is needed to correctly display program data.
- **Clock format**—Select whether to display time in a 12-hour or 24-hour format, or to turn off time display. This setting is available only on TVs that are connected to the Internet. Non-connected TVs do not display time.

Scanning for broadcast TV channels again

There will be times when you need to create a new channel list. For example, you:

- Change cable providers
- Reorient your Insignia Roku TV antenna
- Move to a different city with different channels

Whenever you need to update your TV channel list, you can repeat the channel scan.

To repeat the channel scan, from the Home screen menu, navigate to Settings > TV inputs > Antenna TV > Scan again for channels. Then select Start finding channels to begin the channel scan process. The screens and options that appear during this process are identical to those described in How do I set up the TV tuner? on page 42.

Using your Insignia Roku TV in a home theater

Your Insignia Roku TV has several features that make it an ideal TV for a home theater. But you might not notice them because they remain in the background until you decide to use them.

Turning off Insignia Roku TV speakers

When you use your Insignia Roku TV with a sound bar or an external amplifier and speakers, you'll probably want to turn off the internal TV speakers.

To turn off your Insignia Roku TV's built-in speakers, in the Home screen menu, navigate to Settings > Audio > TV speakers and change the setting.

Changing the audio mode

Your Insignia Roku TV has two audio modes, accessed by navigating in the Home screen menu to Settings > Audio > Audio mode:

- **Stereo**—Use this setting for internal speakers, headphones, and external stereo amplifiers connected through HDMI ARC, SPDIF optical, or headphone jack.
- **Auto**—Use this setting to automatically detect the best audio setting based on the audio stream in the content you are watching. If you have connected your Insignia Roku TV to an external Dolby Digital or Dolby Digital Plus compatible amplifier, receiver, or sound bar through HDMI ARC or SPDIF optical, your Insignia Roku TV automatically selects the appropriate surround sound capabilities of the device based on the characteristics of the current program.
Setting up a digital audio connection

You can connect your Insignia Roku TV to an external amplifier, receiver, or sound bar by using either of these two connections:

• **HDMI ARC**—The HDMI Audio Return Channel enables your Insignia Roku TV to output digital audio on one of its HDMI connectors. The connected amplifier can also function simultaneously as an input source to your Insignia Roku TV, if needed. To use the ARC capability, you must connect an HDMI cable from your amplifier’s HDMI ARC connector to the HDMI ARC connector on your Insignia Roku TV. You also must:
  • Be sure your HDMI cable is certified by HDMI.
  • Select the appropriate setting under **Settings > Audio > Audio mode**, as explained in Changing the audio mode on page 62.
  • Enable HDMI ARC under **Settings > System > CEC**, as explained in Enabling HDMI ARC on page 63.
• **SPDIF optical**—Your Insignia Roku TV has an SPDIF optical connector that outputs a digital audio signal. To use the optical output, connect a TOSLINK optical cable from the amplifier to the Optical or SPDIF connector on your Insignia Roku TV. You also must:
  • Select the appropriate setting under **Settings > Audio > Audio mode**, as explained in Changing the audio mode on page 62.

After making the required HDMI ARC or SPDIF optical connection, go to **Settings > Audio > S/PDIF and ARC option** and select the audio format to use.

Controlling other devices through CEC

Consumer Electronics Control (CEC) enables your Insignia Roku TV and other CEC-compatible home entertainment components to control one other in various ways. First, the CEC-compatible devices must “discover” one another and report their capabilities. After this, one device can control another according to the features you enable. For example, playing a disc on a Blu-ray player could switch your Insignia Roku TV to the Blu-ray player’s input. Or, powering off your Insignia Roku TV could also power off the Blu-ray player and the home theater receiver.

Discovering connected CEC devices

To discover CEC devices:

1. Make sure that your CEC-compatible components are connected to your Insignia Roku TV with a suitable high-speed HDMI cable that supports HDMI ARC and CEC control.
2. Turn on each component and make sure all components have CEC enabled.

   **Tip**
   Some manufacturers have their own branded names for CEC functionality, so you might need to read the product documentation to correctly identify the CEC features of the device.

3. On your Insignia Roku TV’s **Home** screen menu, navigate to **Settings > Control other devices (CEC) > Search for CEC devices**, and then press OK to start the discovery process.

   When finished, your Insignia Roku TV displays a list of CEC devices that are connected to each HDMI input, as well as any devices that had previously been connected. Your Insignia Roku TV remembers the names of multiple CEC devices even when they are no longer connected. If the list is longer than the allowed space, press * to see a complete list in a scrollable window.

Enabling HDMI ARC

HDMI ARC is the audio return channel that is available on one of your Insignia Roku TV’s HDMI ports. The audio return channel enables you to send a Dolby Digital audio signal back to a home theater receiver that is also sending an audio and video signal into your Insignia Roku TV. Using HDMI ARC reduces the number of cables needed and optionally lets you control the volume and mute state of the receiver by enabling system audio control.

HDMI ARC is disabled by default. To enable HDMI ARC, in the **Home** screen menu, navigate to **Settings > Control other devices (CEC)**, and then highlight **HDMI ARC**. Press OK to check the adjacent check box.
Enabling system audio control

System audio control enables your Insignia Roku TV remote control to change the volume and mute state of an amplifier or sound bar connected through HDMI, and to display the external device’s volume and mute status in your Insignia Roku TV's on-screen display.

Your Insignia Roku TV automatically turns off its internal speakers and sends volume and mute control signals to an external amplifier when all of the following are true:

- System audio control is enabled on your Insignia Roku TV.
- A CEC-compatible amplifier is powered on and CEC discoverability is enabled.
- The CEC-compatible amplifier’s HDMI ARC connector is connected to your Insignia Roku TV’s HDMI ARC connector with a suitable HDMI cable.

When the CEC-compatible amplifier is off, your Insignia Roku TV automatically turns on its speakers (unless you have turned them off as described in Turning off Insignia Roku TV speakers on page 62) and resumes local control of volume and mute state.

System audio control is disabled by default. To enable system audio control, in the Home screen menu, navigate to Settings > Control other devices (CEC) and highlight System audio control. Press OK to check the adjacent check box.

Enabling 1-touch play

1-touch play enables a component to control which TV input is active. For example, pressing Play on your Blu-ray player switches your Insignia Roku TV to the Blu-ray input.

1-touch play is disabled by default. To enable 1-touch play, in the Home screen menu, navigate to Settings > Control other devices (CEC) and highlight 1-touch play. Press OK to check the adjacent check box.

Enabling system standby

The system standby feature causes other components to power off when you power off your Insignia Roku TV. Depending on the CEC System Standby implementation, it also might enable connected components to power off your Insignia Roku TV when you power off the component.

System standby is disabled by default. To enable system standby, in the Home screen menu, navigate to Settings > Control other devices (CEC) and highlight System standby. Press OK to check the adjacent check box.

Restarting your Insignia Roku TV

You can restart your Insignia Roku TV when necessary. Restarting has the same effect as unplugging your Insignia Roku TV power and then plugging it in again.

To restart your Insignia Roku TV, navigate to Settings > System > Power and then move right to System restart and then Restart. Press OK to confirm restart.

While your Insignia Roku TV restarts, the screen goes dark for a few seconds, and then displays the startup screen for a few more seconds. When the restart operation is complete, you’ll see the familiar Home screen.

Resetting your Insignia Roku TV

You can choose to reset only your Insignia Roku TV picture and audio settings to their original values, or perform a full factory reset to return your Insignia Roku TV to the state it was in when you first unpacked and turned it on.

Reset Insignia Roku TV settings

To reset only your Insignia Roku TV picture and audio settings to their original values, navigate to Settings > System > Factory Reset, and then highlight Reset TV settings. Read the information on the screen to make sure you understand what the reset operation does.

To proceed with the reset operation, press PLAY/PAUSE three times in a row.

Factory reset everything

A full factory reset returns your Insignia Roku TV to its original, out-of-the-box state. When finished, you must repeat Guided Setup, reconnecting to the Internet, re-linking your Roku account, and reloading any streaming channels. You also must repeat Antenna TV setup and input configuration.

Factory reset is the recommended choice if you want to transfer your Insignia Roku TV to another owner, and is the only choice if you want to switch from store mode to home mode (if you inadvertently selected store mode during Guided Setup).

To perform a factory reset, navigate to Settings > System > Factory reset, and then highlight Factory reset everything. Read the information on the screen to make sure you understand what this reset operation does.

To proceed with the full factory reset, press PLAY/PAUSE three times in a row.
What if I can’t access the Factory Reset option?

It is possible that your Insignia Roku TV might get into a state where you cannot access the various menus, including the menu option that lets you perform a factory reset operation. If that happens, you can force your Insignia Roku TV to reset by following these steps:

1. Using a straightened paper clip or ball-point pen, press and hold the recessed **RESET** button on your Insignia Roku TV connector panel.
2. Continue to hold the **RESET** button for approximately 15 seconds.
   
   During this time, the status light turns off, and then turns on bright, and then pulses. When the reset cycle completes, the light either comes on dim (if your Insignia Roku TV power was off when you started) or your Insignia Roku TV screen comes on and the light turns off (if your Insignia Roku TV power was on when you started).
3. When the status light turns on steady dim or your Insignia Roku TV screen comes on, release the **RESET** button.
4. Proceed through Guided Setup. See Setting up your Insignia Roku TV on page 34.

Getting system updates

If your Insignia Roku TV is connected to the Internet and linked with a Roku account, it will automatically get updates from time to time. You don’t need to do anything. But if you are aware that an update is available and you don’t want to wait until your Insignia Roku TV updates itself, you can manually check for updates.

If your Insignia Roku TV is not connected to the Internet, you can still get updates by using a USB flash drive.

You can download an updated User Guide that matches your Insignia Roku TV software version from the Insigia web site at:

www.insigniaproducts.com

To determine your current Insignia Roku TV software version, go to **Settings > System > About** after you complete Guided Setup.

Checking for updates on a connected Insignia Roku TV

If you’re one of those people who has to have the latest, most up-to-date gadgets the moment they are available, you can check for updates as often as you want.

To check for updates, navigate to **Settings > System > System update**, and then select **Check now**. Your Insignia Roku TV responds either with a message saying that your Insignia Roku TV is up to date, or with a message saying that an update is available.

Follow the instructions on the screen to install the system update.

Getting updates on a non-connected Insignia Roku TV

If your Insignia Roku TV is not connected to the Internet, you can still get system updates by using a USB flash drive and a computer with an Internet connection.

To get a system update, navigate to **Settings > System > System update**:

The System update screen on a non-connected Insignia Roku TV gives you the opportunity to connect your Insignia Roku TV to the Internet to automatically receive updates. We recommend this option if it is possible in your situation. To proceed, select **Connect to the Internet** and follow the instructions in But what if I didn’t connect my Insignia Roku TV? on page 41.
Otherwise, if you can’t connect to the Internet, select I can’t connect, and then follow the instructions on the screen. Here’s a summary:

1. On an Internet-connected computer, go to the web site displayed on the System update screen.
2. On the USB Update web page, select the correct Insignia Roku TV model and then click Download. Save the file to the root folder of a standard USB flash drive.
3. When the download finishes, take the USB flash drive to your Insignia Roku TV and plug it into the USB port. When you do, your Insignia Roku TV validates the files on the flash drive and displays a 12-digit code.
4. Write down the code and the web address, and take this information back to your Internet-connected computer.
5. On the 12-digit code page, enter the code your Insignia Roku TV displayed, and then click Next.
6. On the 6-digit code page, write down the 6-digit code that appears, and then take it back to your Insignia Roku TV.
7. Using your Insignia Roku TV remote control, select Next to move to the next screen, and then use the on-screen keyboard to enter the 6-digit code. When finished, select OK. The system update begins. Do not remove the USB flash drive until your Insignia Roku TV restarts.

When the update finishes, your Insignia Roku TV restarts. You can check the new version number by navigating to Settings > System > About.

Other devices

Screen Mirroring your phone or tablet

Your Insignia Roku TV has a feature called screen mirroring that lets you mirror your smartphone or tablet on your Insignia Roku TV. Share videos, photos, web pages, and more from compatible devices. This screen mirroring feature is in a beta period, which lets you try it out and allows Roku to learn what needs to be improved—so don’t be surprised if it doesn’t work perfectly.

For information on which devices may work with Roku TV screen mirroring and instructions on how to use it, see http://support.roku.com/entries/56266670-How-do-I-enable-screen-mirroring-on-my-Roku-player

Getting and using the Roku mobile app

Roku makes the Roku mobile app free for compatible iOS, Android, and Microsoft Windows 8/8.1 devices.

With the Roku mobile app, you can control your Insignia Roku TV, find and add new Roku Channels, search and find something to watch, and even use your voice to search without typing. More information can be found by going to http://support.roku.com/home and searching for “mobile app.”

Using a universal remote

In many cases, you can program your cable or satellite universal remote control to also control your Insignia Roku TV. You will need to have instructions for programming the remote control handy. Check with your cable or satellite provider for instructions.

For details on how to set up your Insignia Roku TV to work with universal remote controls, visit www.roku.com/universalremote.
Maintaining

- Do not use your Insignia Roku TV in areas that are too hot or too cold, because the cabinet may warp or the screen may malfunction. Your Insignia Roku TV works best in temperatures that are comfortable to you.
- Storage temperatures are 5° to 113°F (-15° to 45°C).
- Working temperatures are 41° to 95°F (5° to 35°C).
- Do not place your Insignia Roku TV in direct sunlight or near a heat source.

Cleaning your Insignia Roku TV cabinet

Clean the cabinet with a soft, lint-free cloth. If the cabinet is especially dirty, moisten a soft, lint-free cloth in a weak detergent solution, squeeze the excess moisture from the cloth, then wipe the cabinet with the cloth. Use a clean cloth to dry the cabinet.

Cleaning your Insignia Roku TV screen

Clean the screen with a soft, lint-free cloth.

You may not commercialize the Mobile Apps in any way. You will not, and You will not allow anyone to, copy, sublicense, lease, sell or rent the Mobile Apps or any part thereof, to analyze it by means of reverse engineering, to decompile, disassemble, attempt to derive the source code of, modify, or create derivative works of the Mobile Apps, or of any updates thereto or any part thereof (except as and only to the extent any foregoing restriction is prohibited by applicable law or to the extent as may be permitted by the licensing terms governing use of any Separately Licensed Code included with a Mobile App). Any attempt to do so is a violation of the rights of Roku and its licensors. If You breach this restriction, You may be subject to prosecution and damages. The terms of this license will govern any upgrades provided by Roku to a Mobile App, unless such upgrade is accompanied by a separate license in which case the terms of that license will govern.

Consent to Use of Data
You agree that Roku or a third party contracted by Roku, may collect and use technical and usage data and related information, including but not limited to, information about Your device, system configuration, content viewed, applications used, and other services (if any) to You related to the Mobile App. Roku may use this and other information it collects about You as described in its Privacy Policy, available at www.roku.com/about/privacy. A list of countries and territories from which we do not export or re-export the Television or Mobile Apps or their content, data or services, including but not limited to, information about Your device, system configuration, content viewed, applications used, and other services (if any) to You related to the Mobile App, is available at www.roku.com/about/exportcontrols.

Export Controls
You agree not to download any Content, Mobile App or Software, nor export or re-export the Television or Mobile Apps or the Software into (or to a national or resident of) Cuba, Iran, Libya, North Korea, Sudan, Syria or any other country as to which the United States has imposed economic, or to anyone on the U.S. Treasury Department’s List of Specially Designated Nationals or the U.S. Department of Commerce’s Table of Denial Orders. By using the Television, the Channel Store, the Software or the Mobile Apps, You are representing and warranting that You are not located in, under the control of, or a national or resident of any such country or on any such list.

Roku Reserves the Right to Change Policies and Web Pages
The policies and other content of the Roku web pages referred to in this Agreement may be changed by Roku from time to time at its sole discretion, without notice to You.

Dispute Resolution by Binding Arbitration, with Class Action Waiver and Choice of Law

• You and Roku agree to be bound by the procedures set forth below to resolve any and all claims arising out of or relating to any aspect of the relationship between You and Roku, whether based on contract, statute, tort, fraud, misrepresentation or any other legal theory, including but not limited to, claims covered by this Agreement, its formation, enforceability, performance or breach, and claims related to advertising, the Software, the Television, the Channel Store or the Mobile Apps (as applicable). Each such claim is referred to individually as a “Claim” and collectively as “Claims”.

• AND Roku AGREE THAT, EXCEPT FOR THE CLAIMS IDENTIFIED IN PARAGRAPH 4 BELOW, ANY AND ALL CLAIMS BETWEEN YOU AND ROOKU SHALL BE FINALLY SETTLED BY BINDING ARBITRATION. The arbitration shall take place in Santa Clara County, California, and shall be administered by the American Arbitration Association (“AAA”) pursuant to the AAA’s then-current rules, including (if applicable) the AAA’s Supplementary Procedures for Consumer-Related Disputes. Please be aware there is no judge or jury in arbitration. Arbitration procedures are simpler and more limited than the rules applicable in court, and review of the arbitrator’s decision by a court is limited. YOU
AND ROKU FURTHER AGREE THAT EACH MAY BRING CLAIMS AGAINST THE OTHER ONLY ON AN INDIVIDUAL BASIS AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY PURPORTED CLASS OR REPRESENTATIVE ACTION OR PROCEEDING. THE ARBITRATOR MAY NOT CONSOLIDATE OR JOIN MORE THAN ONE PERSON’S CLAIM AND MAY NOT PRECLUDE OVER ANY CONSOLIDATED, REPRESENTATIVE OR CLASS PROCEEDING. ALSO, THE ARBITRATOR MAY AWARD RELIEF (INCLUDING MONETARY, INJUNCTIVE OR DECLARATORY RELIEF) ONLY ON AN INDIVIDUAL BASIS AND MAY NOT AWARD ANY FORM OF CONSOLIDATED, REPRESENTATIVE OR CLASS-WIDE RELIEF. Notwithstanding any provision in these terms to the contrary, if the class-action waiver in this provision is deemed invalid or unenforceable, or if an arbitration of a Claim between You and Roku is allowed to proceed on a class-wide basis then neither You nor Roku are entitled to arbitrate such Claim. This arbitration provision is subject to the Federal Arbitration Act. The arbitrator’s award shall be binding on You and Roku, and may be entered in any court of competent jurisdiction.

• Information on AAA and how arbitration is initiated can be found at www.adr.org or by calling 800-745-3636. For Claims between You and Roku of $75,000 or less, You will be responsible for the initial filing fees, up to the amount of the initial filing fees if You were to initiate a lawsuit against Roku based on such Claims. In court, if the arbitrator finds such Claims to be non-frivolous, Roku will pay any difference in such filing fees plus the arbitrator fees. For Claims between You and Roku in excess of $75,000, if You are able to demonstrate that the costs of arbitration will be prohibitive as compared to the costs of litigation, Roku will pay as much of Your actual filing fees and the arbitrator fees for the arbitration as the arbitrator deems necessary to prevent the arbitration from being cost-prohibitive as compared to the cost of litigation.

• This agreement to arbitrate does not apply to any Claim (i) in which a party is attempting to protect its intellectual property rights (such as its patent, copyright, trademark, trade secret, or moral rights), but not its business or trade or proprietary rights, or (ii) initiated by a non-individual person.

• If the agreement between You and Roku to arbitrate in this provision is found to be invalid, unenforceable or inapplicable to a given Claim between You and Roku, then any and all proceedings to resolve such Claim must be brought exclusively in a federal court or state court in the Northern District of California or a state court in Santa Clara County, California. You hereby irrevocably consent to the exclusive jurisdiction and venue of such courts.

30-Day Right to Opt Out
You have the right to opt out of this agreement to arbitrate by sending a written notice of Your decision to opt out to the following address: Legal Department, Roku Inc., 12980 Saratoga Avenue, Suite D, Saratoga, California 95070. You must postmark Your written notice on or before the 30th day after the first to occur of the following events: (i) the purchase of Your Television, (ii) Your receipt of the Television, (iii) the establishment of a new Roku Account if You do not already have a Roku Account prior to using Your Television, (iv) using or accessing the Channel Store, or (v) using, accessing or downloading the Software or any Mobile App. Your notice should include Your full name, Your current postal address, telephone number and email address, the product name and serial number for Your Television, and a copy of the original proof of purchase for Your Television. If You timely send a notice in compliance with this paragraph 6, the agreement to arbitrate will not apply to either You or Roku. If You do not timely send this notice, then You agree to be bound by this agreement to arbitrate.

• Notwithstanding any provision in this Agreement to the contrary, You agree that, if Roku seeks to delete or materially modify the agreement to arbitrate described herein, any such deletion or modification will not apply to any individual Claim between You and Roku, of which You have notified Roku prior to such modification.

Choice of Law
This Agreement shall be governed by the laws of the State of California, as if entered into by residents of California, without giving effect to any conflict of laws principles that may provide the application of the law of another jurisdiction.

Miscellaneous
This Agreement is the final, complete and exclusive agreement between You, on the one hand, and Roku and Insignia, on the other hand, relating to the Television, the Channel Store, the Software and the Mobile Apps (as applicable), and supersedes all prior or contemporaneous proposals, advertisements, representations, understandings, or agreements relating thereto, whether oral or written, provided that, notwithstanding the foregoing, this Agreement is not intended to modify or supersede the Important Product Information Guide and other documentation provided to You with the Television. No waiver or modification of this Agreement will be valid unless signed by Roku, Insignia and You. Your right to use the Television, the Software, the Channel Store, Your Roku Account, the Software, or the Mobile Apps (as applicable) will immediately terminate upon Your breach of any applicable provision of this Agreement. The waiver of a breach of any term hereof will in no way be construed as a waiver of any other term or breach hereof. If any provision of this Agreement is held by a court of competent jurisdiction to be invalid or unenforceable, the remaining provisions of this Agreement will remain in full force and effect.
